**Re: Permitted Oral *Ex Parte* Presentation
ET Docket No. 08-59**

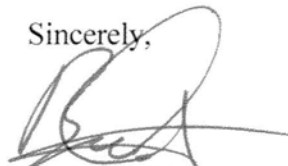

Dear Ms. Dortch:

On June 25, 2009, representatives of the Aerospace and Flight Test Radio Coordinating Council ("AFTRCC") met with Renée Roland Crittendon, Senior Legal Advisor to Commissioner Jonathan Adelstein, to discuss the above referenced proceeding. Attending the meeting on behalf of AFTRCC were Marc Ehudin, Textron Corporation (Cessna), Daniel Jablonski, Johns Hopkins University Applied Physics Laboratory, Chip Yorkgitis, Kelley, Drye & Warren LLP for Raytheon Company, Frank Weaver, The Boeing Company, Patrick Swygert, a Boeing intern, and the undersigned.

The points made during the meeting were consistent with AFTRCC's prior written submissions in this proceeding. The parties urged the Commission to ensure that any Notice of Proposed Rulemaking that is adopted thoroughly proposes and considers spectrum allocations for BSN devices that do not require co-frequency spectrum sharing with flight test operations. In this regard, Boeing officials observed that AFTRCC has expressed willingness for the Commission to allocate spectrum at the lower and upper edges of the flight test band for BSNs (2300-2305 MHz and 2390-2400 MHz).

Please contact the undersigned if you have any questions.

Sincerely,

Bruce A. Olcott
